
THE BETWEEN
FLOOR 1/7
TIME 59:40
THE BEST AI CHEF?
I BUILT THE KITCHEN.
Intelligence alone is not a system.

METAXIS

IN AN EMPTY ROOM,
NOTHING GETS
COOKED.

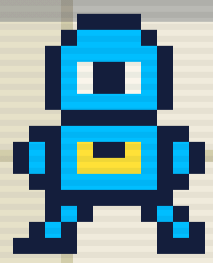

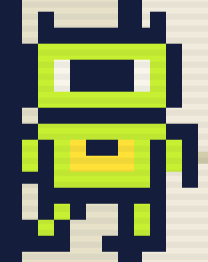

What the empty room lacks

- [ ] No ingredients
- [ ] No tools
- [ ] No orders
- [ ] No quality control

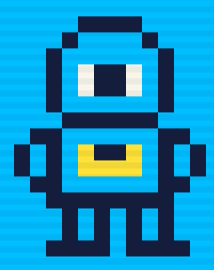

The kitchen brings ingredients, tools and rules. It checks what comes out.

MODEL

Reasons and does the work.

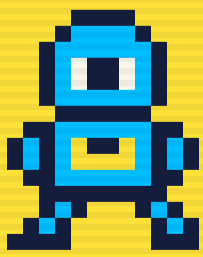

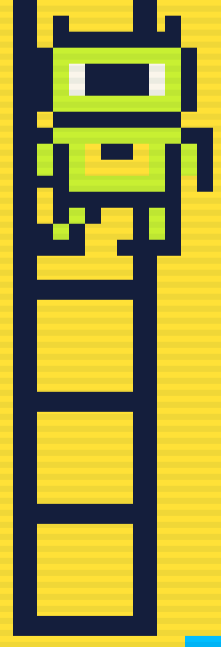

HARNESS

Decides what it can access and which actions are allowed.

The Metaxis Harness separates intelligence from authority.

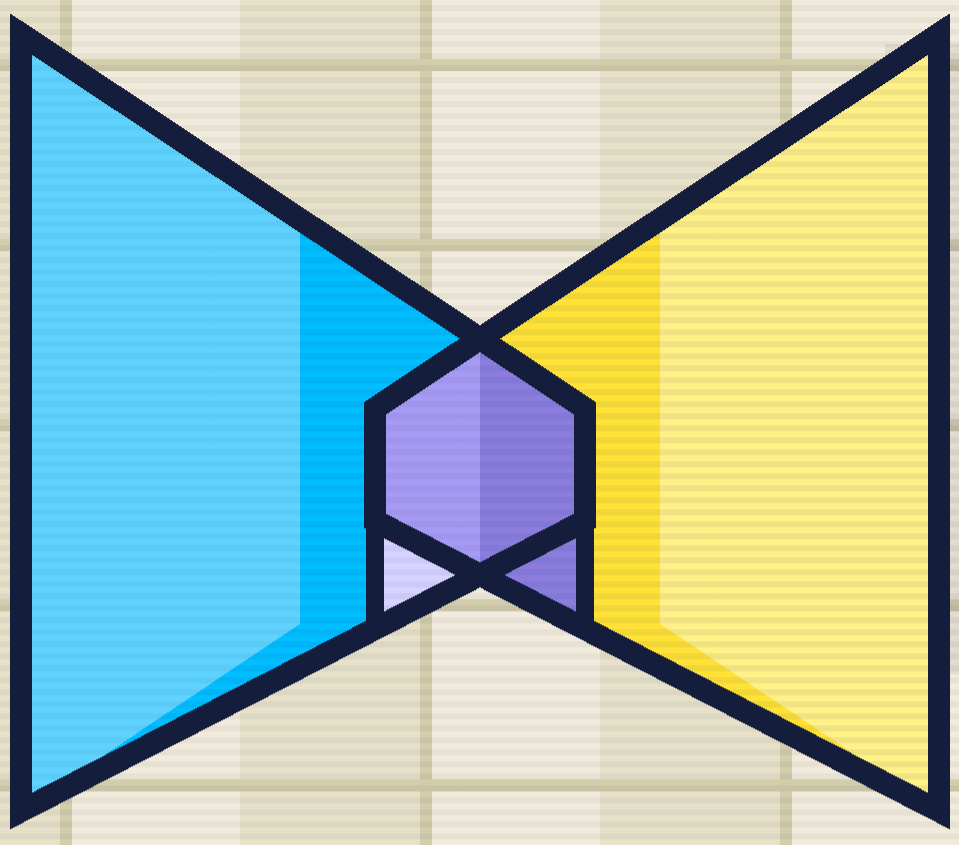

The Harness decides

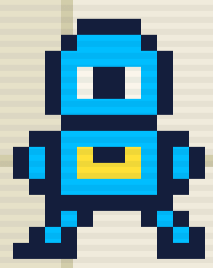

- What it can access
- Which actions are allowed
- When approval is needed
- What evidence counts

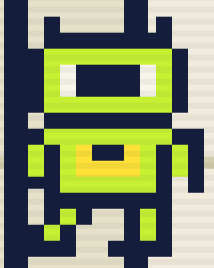

The model does the work. The Harness holds the authority.

STILL NEEDS A CHECK.

"DONE" IS NOT DONE.

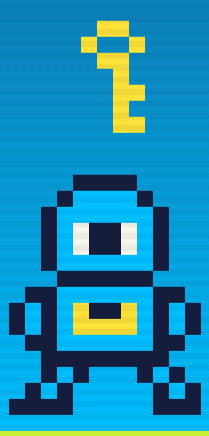

THE BETWEEN ROOF CLEAR

SWAP THE CHEF. KEEP THE KITCHEN.

The goal: real, controlled, verifiable work. metaxis.io
