

SMARTER MODELS, ARCHITECTURE DOESN'T HAVE TO GET BIGGER.

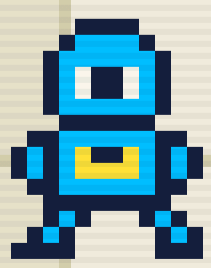

How much orchestration is actually necessary?

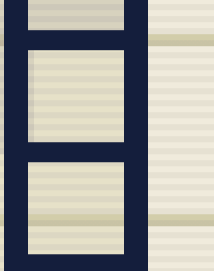

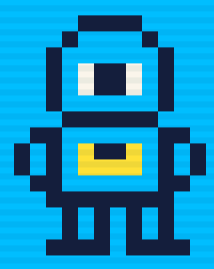

SIMPLER CAN WORK.
FOLDERS, PROMPTS, TOOLS.

BEFORE

Explicitly programming every step.

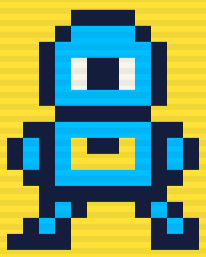

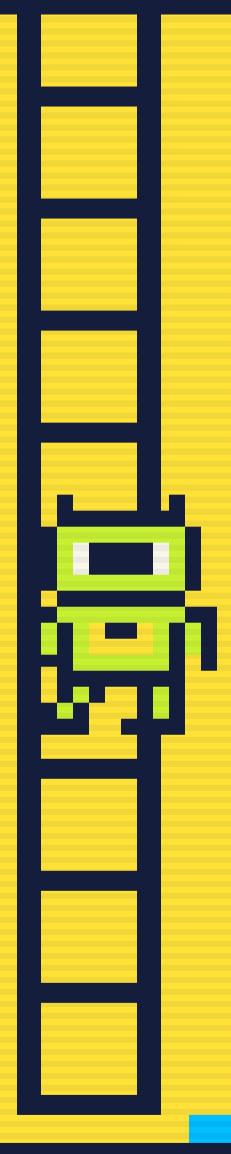

INSTEAD

The model can determine how to complete a task within boundaries.

Less effort micromanaging execution.

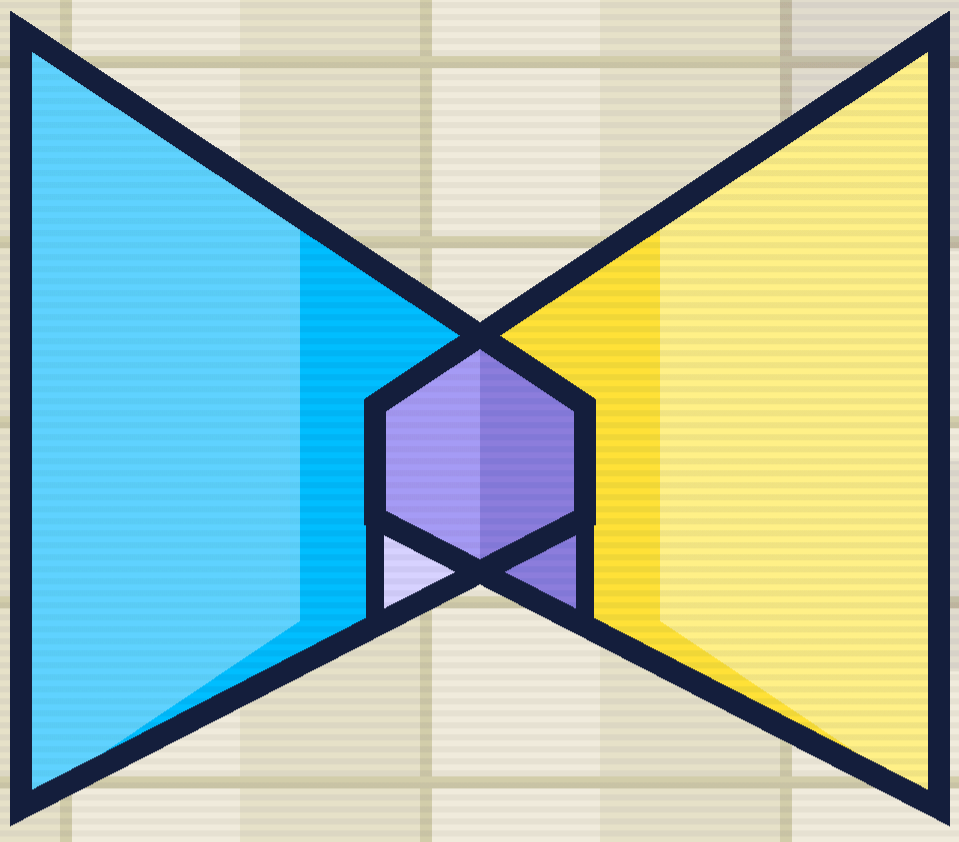

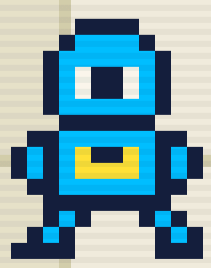

Spend the effort on

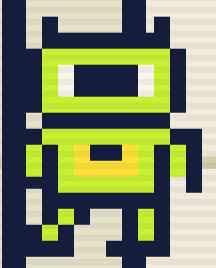

- [ ] Context quality
- [ ] Tool interfaces
- [ ] Result verification

Less effort micromanaging execution.

NOT OBSOLETE.
JUSTIFY THEIR
COMPLEXITY.

THE REAL CHALLENGE: MODEL DECIDES, SYSTEM CONTROLS.
